

Flexi COAT Waterproofing (4 Layer Coating)

DESCRIPTION OF CHEMICALS

Aquaprime-99: Aqua prime- 99TM plays major role in facade coating system. It forms a dry water repellent zone beneath the coating consolidate the substrate and enhance bonding of the coating. It is gas permeable, durable, protects paints & plasters against harmful influences form within the masonry.

Flexi Coat Black: Engineer Plus Flexi Coat is Cold applied liquid, waterproofing membrane, specially designed from a blend of special resin and rubber reinforced with special water repelling fillers, minerals, stabilizers and gelling agent.

DRY Powder EP44 – Dry Powder EP 44 is a blended polymer modified with grey cement base adhesive to improve strength of the surface.

APPLICATION PROCESS

- Apply a self-priming 1st Coat of Flexi Coat (diluted with water in 1:1 ratio.)
- Apply 2nd & 3rd Coats of Flexi Coat without dilution. Highly waterproofing & crack resistant coating with elastomeric properties.
- Apply 4th Coat of Aquaprime-99, Water & DRY Powder EP44W (1: 1.5: 2)

Note: For the consumption details kindly refer to our Technical data sheet present in our main company profile of products. Or kindly download the TDS of the product from our website www.engineerplus.in
